

Training Delivery

January 2021

We, at Siamo Training, are proud to announce that we are continuing all training remotely and online. We have been constantly adapting and growing our use of technology and remote learning since March 2020.

For existing and future learners on both SSW and Apprenticeships:

Most of our training is still trainer led. All training is now delivered via Microsoft Teams. You do not need to have Teams to access sessions - your trainer/assessor will send you a link as a part of your invite and you can click the link to attend, so long as you have access to a smart phone, laptop, or tablet. If you do not have the tools to learn remotely, please speak directly to your assessor and we will support you with alternatives.

We also continue to use an online E-Portfolio system to allow ease of work being uploaded and viewed by all parties.

Where face to face learning, such as coaching and observation, cannot be completed remotely, we will only conduct such sessions in a safe environment following all Covid-19 safety guidelines.

If you have any concerns regarding the future of learning with us, please speak to your trainer or contact Melissa Hope, Head of Apprenticeships – m.hope@siamogroup.com

Melissa Hope commented 'I am extremely proud of the way our learners, trainers and employers have adapted to new ways of us working and the remote delivery methods. We worked together to ensure that the new ways work for all parties. It actually gave us all the push we needed to advance our use of technology and has made us stronger and more flexible now in terms of our offer.'

Siamo Training offer both funded and bespoke training as well as apprenticeships in:

Customer Service

Leadership and Management

Manufacturing

Supply Chain

Mental Health

English

Maths

If you would like to know more about accessing remote training, please contact:
